

FAAS Team presents:

Plane Sense

This seminar is dedicated to the memory of Thomas White, manager of the Sugar Valley Airport, who passed away on October 30. There is more to an aircraft's airworthiness than just a good pre-flight inspection. Aircraft operators should know and be familiar with any modifications to their aircraft certification (STCs), any of the installed avionics equipment, and special operating limitations. Also important is knowledge of airworthiness alert bulletins, service difficulty reports (SDRs), and many others. **SPECIAL FEATURE:** Listen to an account of a recent Cirrus Parachute deployment at night following a total engine failure here in North Carolina by the pilot himself. Click on the link below and register **TODAY**.

Directions: From I-40, take Exit 174 Farmington Road. Proceed North to Gilbert Road and turn Right. Airport is at the end of Gilbert Road. Detailed Driving Directions

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
